

ARDRIVE

SECURE, PERMANENT STORAGE

November 5th, 2020

Beta Demonstration and Community Distribution

What will we cover today?

- 1) ArDrive Community Token Distribution
- 2) Demo of Beta Web app and Command Line Interface

Our *Vision*

Create a private, secure, decentralized, pay-as-you-go,
censorship-resistant and *permanent* data storage solution,
for everyone.

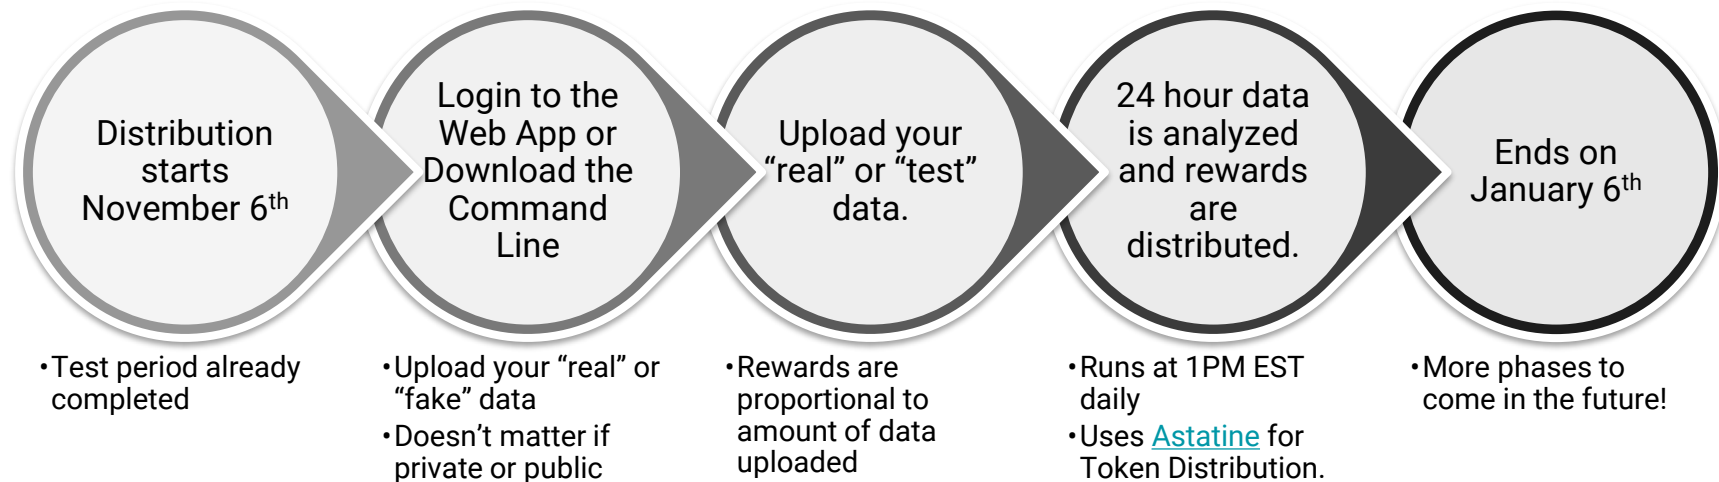

The first *AR*DRIVE token distribution

Codename - “Aztec”

Our unique way of
rewarding our earliest
community members
for testing our apps
and providing feedback

Exploring *Aztec* a bit deeper

Check out the app, upload some files, get some tokens.

How many *tokens*, how *often*

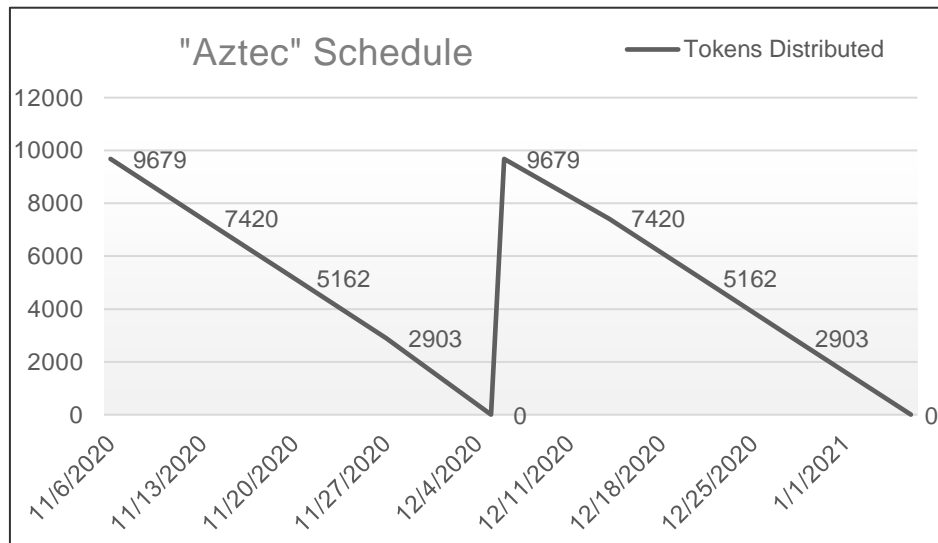

3% of the **ARDRIVE** token supply will be distributed across two schedules

- Schedule 1 starts Nov 6th, 2020
- Schedule 2 starts Dec 6th, 2020

Each schedule distributes 150,000 tokens over 30 days.

Testers who upload more data get a higher weight and reward.

Linear decrease in rewards day after day until 0.

View token balances on the [ARDRIVE Community Portal](#)

Assuring a *Quality* user experience

Week of November 11th

Call for Community Testers!

Check the Opportunity board for more info
on how to participate.

Web and Command Line Demo Time

The ARDRIVE Core, CLI and Web App

- Our [Node.js/Typescript Core](#) is the back end for the future desktop app
- While our UI is being developed, the core can be accessed via our [CLI](#) ([available on NPM](#)).
- Using the [Arweave Dart](#) Standard library, our [Flutter](#) web app (<https://app.ardrive.io>) lets you securely login, view, download and update your ARDRIVE files on any device.

More features left to add

Web App

- Multi-file upload
- Drag and drop upload
- Quick Public Drive view
- Easy drive and file sharing

Command Line

- Full UI (duh!)
- File icon overlays
- Old Version Restore
- Cloud Only Files
- Easy drive and file sharing

Helping you throughout the way
